GovEnrich

AI-Powered Government Lead Intelligence

Bridging the data gap between Apollo.io and public government records
to supercharge law enforcement sales intelligence.

Apollo × Google Cloud Hackathon | Best Use of Claude Code

Kyle · EdgeTrace, Inc.

The Problem

Selling to law enforcement agencies means navigating fragmented, incomplete data.

Apollo Gaps

No sworn officer counts or agency-specific metrics for government orgs.

Data Silos

FBI, USASpending, and Census each live in separate portals with different formats.

Manual Research

Reps spend hours stitching together data from 4+ sources per prospect.

The Solution

GovEnrich: One MCP command unifies 4 data sources into a single enriched record.

Apollo.io
Org data, contacts, revenue, domains

FBI CDE
Sworn officer counts, agency type, ORI codes

USASpending
Federal grants, tech budget signals

Census API
Local government finance data

GovEnrich MCP Server
4 tools · Go binary

Unified Output

- Sworn officers
- Revenue & size
- Federal grants
- ICP fit score
- Key contacts

Built with Claude Code

Three autonomous Claude Code agents wrote, tested, and shipped every line of GovEnrich.

Multi-Agent Architecture

Three specialized Claude Code agents (Server, Tools, Integration) worked in parallel on separate concerns.

Spec-Driven Development

Claude Code generated detailed SPEC.md files, then each agent implemented against them autonomously.

Concurrent Fan-Out Design

Claude Code designed the Go concurrency patterns — parallel API calls with graceful partial failure.

End-to-End Testing

Built the --hello-world connectivity harness and stub MCP server for integration smoke tests.

By the Numbers

3	Claude Code Agents wrote the code
4	MCP Tools shipped
10+	API Endpoints wired
0	Lines written by hand

Live Enrichment

enrich_gov_agency → "Pleasanton Police Department", CA

Agency Profile

Agency	**Pleasanton Police Dept**
State	**California**
Type	**City Police**
ORI	**CA0013700**
Sworn Officers	**~70**
Domain	**cityofpleasantonca.gov**
Employees (city)	**~500**
Revenue (city)	**$150M+**

ICP Fit Score

85 /100

HOT LEAD

+30 Sworn 50–100 (ICP sweet spot)
+20 City agency type
+15 California market
+15 Active federal grants
+5 Apollo domain found

Federal Grants Found

COPS Technology Grant
$250K · Active · Dept of Justice

BJA Body-Worn Camera Program
$175K · Active · OJP

What's Next?

Draft Outreach Tool

Claude generates personalized cold emails using enrichment data.

Pipeline Scoring

Auto-rank entire state agencies by ICP fit for territory planning.

More Data Sources

NIBRS crime stats, state POST records, procurement portals.
